

OPEN LAB SEVEN EVALUATION RUBRIC

	Description	Points
Program Development	If program has compilation error.	-50
	If program terminates with run time error.	-50
Documentation	Main Comment Block contains: (due date (1), author name(1), course-section #(1), and program description (2)).	5
	Comments have been added to each group of logically related statements <ul style="list-style-type: none"> - above each decision statement (if, if/else) - above each loop statement - above one or more sequence statements that together accomplish a cohesive task 	5
	Descriptions (optionally also include :Pre-condition, and post-condition) have been written above each user defined function (above the function definitions)	5
Style	Variable: <ul style="list-style-type: none"> • Meaningful variable names are used unless specified by the program description • Variable naming convention is followed • No global variable is used 	2
	Indentation and white spaces are used to make the program easier to read. <ul style="list-style-type: none"> • All the decision statements are indented properly. • All the repetition statements (loops) are indented properly • Blank lines are used in front of each block of logically related statements 	3
Correctness	Program solves the assigned problem using methods described in program description: <ul style="list-style-type: none"> - Circular doubly linked list with dummy head is implemented for the list - - 6 user defined functions are implemented as discussed in the project description: Insert, Delete, Retrieve, Print, InitializeHead, DestroyList - The main function logic is implemented correct as required 	50
	Program produces the correct output.	30
