

## **Submission of Projects on Replit**

- 1) Submit the project by clicking on the “Submit” button in the Replit Programming environment. The “Submit” button is located on the upper right corner.
- 2) Submit the project before the Due date to ensure no late penalty points is deducted.
- 3) After submission, do not change/edit the code anymore.
  - a. The last edit date is considered the final revision date. If that date is past due date, the project is considered late submission.
- 4) If submitting after the due date:
  - a. If you want to use the late pass on that project assignment to avoid 15 late penalty deduction, write a statement “Use pass #1 (or #2) on the first line of the main program.
  - b. If you do not want to use the late pass on that project, do not write “Use pass” on the first line of the main program. 15 points will be deducted for late submission
  - c. Each student has 2 late passes to use
- 5) After 7 days, the Replit project will be closed. Students are not able to edit/submit the project anymore
- 6) The project will be re-opened after all the projects have been graded.
