

CSCI 6350/7350 Semester Project

Presentation: 15-20 minutes

- **INTRODUCTION:** Introduction of the problem you have been researching
 - Background of the problem
 - Description of the data
 - What do you want to find as the result of your research
- **BACKGROUND:** Previous work in this area, or on your data
- **METHODOLOGY:** Design of your research method
 - What approaches do you plan to use
 - Methods developed/used
 - Steps involved in your research
- **EXPERIMENTS**
 - Experiment 1 → Results
 - Experiment 2 → Results
 - ...
- **ANALYSIS and DISCUSSION**
 - What are the rules/patterns/models etc discovered in your study?
 - What is the performance of the system?
 - How does your result compare to those from the prior work on this topic/data?
 - Any insights from domain-specific view to interpret the results?
 - ...
- **CONCLUSIONS**

Turn in the project data, programs, and the presentation slides to D2L dropbox marked “Final Project” by midnight Friday April 28th.
